

Hundreds of learners flock to NMMU Open Day

NMMU Open Day is one of the highlights of the year as we showcase all subjects and programmes that are on offer at the university.

Prospective students see and experience practically what the School of Engineering amongst the other faculties, is all about. The School prides itself in being the best in every aspect, from the classroom and beyond. Tying up with this year's theme of "Getting your future in focus", each school had a photo booth in which all prospective students, NMMU staff and assistants could be a part of and engage in at our stalls.

We would like to thank all staff and students who exhibited at the Open Day for the School of Engineering and availed their services and expertise. The event was a resounding success with well over 6000 visitors attending over the two-day period.

We are very proud of the School of Engineering that won: Runner-Up for the Most Visually Appealing Stall. We would also like to thank the staff of the School of Engineering who made that possible.
