

## **German Exchange student doing his internships at AMTC**

My name is David Steiner, I am a Mechatronics Student from Reutlingen in Germany. At the moment I am doing my internship at the NMMU in South Africa. My current task is assisting Stuart Church with his master thesis, we are working on an Energy Management System for an AGV. This project is a cooperation between the NMMU and VWSA. I will be working on this project until end of June, then I am heading back to Germany to get my Bachelor in the following two semesters.
